KUBIK

LEARN MORE ABOUT "KUBIK"

"KUBIK" is a brand-new GSM trail camera designed in Russia. This trail camera has ultra-low power consumption, possibility of uploading photos to Yandex.Disk, as well as availability of Wi-Fi module enabling enjoying advantages of the trail camera via Wi-Fi network without having to connect to cellular network.

"KUBIK" is easier to set up than any other trail camera credit for specifically developed mobile application: there is no need to deal with unclear SMS-instructions, or remove the trail camera from the tree or housefront again and again for interface configuration.

KUBIK's PIR-sensor minimizes the false activation of the trail camera. KUBIK will free you of unnecessary spendings for MMS and will not disturb you needlessly.

KUBIK

LEARN MORE ABOUT "KUBIK"

KUBIK's power consumption in standby mode is offset (~ 65 microamperes). With the possibility of uploading photos to Yandex.Disk you will enjoy not only the advantage of storing of all photos in one cloud folder, but also the possibility to share the access to the photos taken by KUBIK.

Space-saving and secure, KUBIK will keep watchful guard around your property or track the wild fowl in hunting areas, instantly uploading full-sized photos even at poor cellular signal.

KUBIK is tested in thermo climate control unit at the military-industrial enterprise "Severny Reid" and ensures safe operation at temperature range from -60°C to +65°C and humidity of 99%!

KUBIK
